## PROFESSIONAL SUMMARY

Computer Science and Engineering student at East West University with a growing focus on Data Science and Machine Learning. Building a solid foundation in core programming, database systems, problem-solving, and web technologies while actively strengthening Python, SQL, and data analysis skills through practical project work.

## EDUCATION

|                                                                                                                                                 |                                             |
|-------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>East West University</b><br><b>B.Sc. in Computer Science &amp; Engineering (3rd Year)</b><br>Academic Focus: Data Science & Machine Learning | 2023 – 2028 (Expected)<br>Dhaka, Bangladesh |
| <b>Shahid Smrity Degree College</b><br><b>Higher Secondary Certificate (HSC) – Science</b>                                                      | 2022<br>GPA: 5.00 / 5.00                    |
| <b>Government Swarupkathi Pilot Model High School</b><br><b>Secondary School Certificate (SSC) – Science</b>                                    | 2020<br>GPA: 5.00 / 5.00 (Golden A+)        |

## TECHNICAL SKILLS

|                               |                                  |
|-------------------------------|----------------------------------|
| <b>Programming:</b>           | C, C++, Java, Python, JavaScript |
| <b>Web Development:</b>       | HTML5, CSS3, JavaScript, React   |
| <b>Databases:</b>             | MySQL                            |
| <b>Tools &amp; Platforms:</b> | Git, GitHub, VS Code             |

## CURRENTLY LEARNING

Python → Data Science → Machine Learning

Python for Data Science

Data Cleaning & Analysis

SQL

Statistics & Probability

Machine Learning Fundamentals

## RELEVANT COURSEWORK

Data Structures

Algorithms

Database Systems

Object-Oriented Programming

Operating Systems

Computer Networks

Digital Logic

Computer Architecture

## PROJECTS (CURRENTLY BUILDING)

### Practical Software & Data Science Showcase

Currently developing practical software and data-focused projects to demonstrate core programming concepts, database interaction, and data analysis. Project repositories focusing on Python data analysis, MySQL database integration, and React application logic will be published to GitHub.
